On-Page SEO Optimisation Report

Prepared for **Dex Flooring** · dexflooring.com.au · 2 July 2026 · on-page SEO work delivered over the past two months

Executive summary

Over the past two months we ran an on-page SEO optimisation programme across the Dex Flooring product catalogue. Every product page was reviewed and given a search-optimised **page title** and **meta description** — the text that decides how each page appears in Google and how many shoppers click through. The work adds local ("Melbourne") and product keywords, a clear benefit, and a call to action within Google's display limits. We also added descriptive **ALT text** to product images so they can appear in Google Images and meet accessibility standards.
