

On-Page SEO Optimisation Report

Dex Flooring · dexflooring.com.au

Prepared: 1 July 2026 · On-page SEO work delivered over the past two months

Executive summary

Over the past two months we ran an on-page SEO optimisation programme across the Dex Flooring product catalogue. Every product page was reviewed and given a search-optimised **page title** and **meta description** — the text that decides how each page appears in Google and how many shoppers click through. The work adds local ("Melbourne") and product keywords, a clear benefit, and a call to action within Google's display limits.

Verification & next steps

All titles & descriptions above are **live** on dexflooring.com.au and confirmed in each page's HTML. The next stage of proof is **Google Search Console** — clicks, impressions and average ranking position for these pages over the coming 4-8 weeks, which we will report as the outcome of this work.

Search-result previews are simulated to show the optimised title & description; Google refreshes the live appearance as it re-crawls each page.
